

COLOMBIA

NATIONAL ADAPTATION PLAN (NAP) APPROACH

Development of climate change plans for all territories and implementation of innovative adaptation measures in six priority sectors

The NAP process aims at reducing the **socio-economic risks and impacts** associated with variability and climate change. It seeks to generate knowledge on climate change risks and opportunities, incorporate climatic risk management in **sectoral and regional planning**, and reduce the vulnerability of socio-economic and ecological systems to climate change.

Department of National
Planning

SECTOR & VERTICAL INTEGRATION

“ The NAP is not a document, but a dynamic process that evolves constantly. It is an instrument that establishes strategic guidelines and that provides decision-makers with tools to prioritize adaptation actions. It helps to inform interventions in different sectors and territories aimed at reducing climate change risk and vulnerability.”

October 2018

The NAP Global Network is a group of individuals and institutions working to enhance national adaptation planning and action in developing countries. This poster is part of a series highlighting lessons emerging about the NAP process.
